RESEARCH QUESTION

How the excessive use of non-electrical transports in a small area, which leads to air pollution in Corvo island

SUMMARY OF PROJECT

The local problem that we are presenting is the excessive use of non-electrical transports in a small area, which leads to air pollution. We chose to approach this theme because we are worried about air pollution as well as noise pollution caused by the excessive use of means of transportation. As an example, we can point out that in 15 days six new cars arrived to Corvo island. Having in mind the number of inhabitants and the means of transportation used on the island, we can state that some people own more than one car. By approaching this subject, we want to inform our community about the unnecessary cars and their consequences because if they continue using them in this way, they will cause more and more pollution, and the breathing air will be harmful for our health.

Day	Time	Place	Total of cars
08/04/2021 Thursday	15:15 – 16:00	Rua Jogo da Bola Rotunda do Ribeirão	44
10/04/2021 Saturday	12:00 – 12.45	Rua Jogo da Bola Rotunda do Ribeirão	26
24/04/2021 Saturday	12:00 – 12.45	Rua Jogo da Bola Rotunda do Ribeirão	52
29/04/2021 Thursday	15:15 – 16:00	Rua Jogo da Bola Rotunda do Ribeirão	55
